Summary

Python Backend Developer with strong experience in REST API development, automation, and data-driven systems. Skilled in FastAPI, Django, Flask, and database optimization. Delivered scalable backend solutions with measurable performance improvements across AI, analytics, education, and system-level platforms.

Education

B.Tech in Computer Science Engineering, ITM GIDA Gorakhpur

Intermediate & High School, Saraswati Shishu Mandir Inter College

Skills

Languages: Python, JavaScript, PHP, C++, C, SQL

Frameworks: FastAPI, Django, Flask, REST APIs

Databases: PostgreSQL, MySQL, MongoDB

AI & Data: Data Processing, Analytics Pipelines, Automation Scripts

Tools: Git, GitHub, Postman, Docker (basic), VS Code

Experience

Backend Developer Intern, Medical Book

- Developed backend services handling 1K+ medical records and workflows.
- Designed 15+ REST APIs for appointments, prescriptions, and reports.
- Optimized queries and logic, reducing API response time by 30%.

Python Developer, My Branding Hub

- Built Python automation scripts reducing repetitive tasks by 35%.
- Developed backend features and APIs for multiple client platforms.
- Assisted in deployment and maintenance of production systems.

Projects

- **NeuroSpeak – AI Interview Analyzer (FastAPI) — 5 days:** Built a Python backend to analyze speech, tone, and text data. Processed 1K+ interview records using REST APIs and analytics pipelines.
- **IoT Parking Management System (Python APIs) — 4 days:** Developed Python APIs for real-time occupancy detection using sensor data, enabling automated status updates and alerts.
- **CampusHub (Django REST Framework) — 5 days:** Created backend services for file storage, forums, submissions, and role-based access supporting 30+ users.
- **Ayer Connect — Inter Device File Sharing (Python) — 4 days:** Created the encrypted-content sharing app in flutter for PC - PC, Mobile - PC.
- **College LMS (Laravel Backend + Python Services) — 5 days:** Integrated Python services for analytics and automation alongside Laravel APIs, supporting attendance and academic workflows.
- **The Shades Store (PHP) — 4 days:** Built e-commerce backend with inventory and order management (supporting project demonstrating multi-stack experience).

Achievements

- Smart India Hackathon Finalist (Top 1% National Level).
- NCC 'B' Certificate Holder.
- Delivered multiple backend systems with measurable performance impact.
