Professional Summary

Backend-focused Software Engineer with nearly **1 year of combined industry experience** specializing in PHP ecosystems. Proven track record in building custom MVC frameworks, scalable RESTful APIs, and complex web architectures. Expert in modernizing legacy PHP applications and integrating AI-driven automation into enterprise-grade systems.

Technical Skills

Primary PHP Stack: PHP (Core, MVC), Laravel, CodeIgniter, OpenPHP Framework

Other Languages: JavaScript (ES6+), Python, SQL, C++

Frontend: React.js, Tailwind CSS, Blade Templates, GSAP, Framer Motion

Backend & DB: Node.js, Express.js, MySQL (Relational Design), MongoDB, JWT Auth

Tools & Devops: Git, GitHub, Postman, Docker, Razorpay API, PayPal REST SDK

Specialized: Agentic AI Integration (Groq/Gemini), UDP Networking, Linux

Professional Experience

Software Developer Intern — Cognivox Technology

2026 – Present (3 Months)

- Architecting scalable backends and custom API endpoints using high-performance PHP frameworks.
- Streamlining internal workflows through automated scripts and modern MVC architectures.

Backend Developer Intern — Medical Book

2025 – Present (4 Months)

- Engineered robust backend modules using **Laravel** for a high-traffic doctor-patient coordination system.
- Designed and optimized RESTful APIs that increased data processing efficiency by **35%**.
- Contributed to the development of **MoneyCats**, ensuring stability for **500+ concurrent users**.

MERN Developer — My Branding Hub

2023 (2 Months)

- Delivered full-stack authentication modules and database schemas for client branding platforms.

Key Projects

• **Brainys — Advanced Exam Portal**

dev34.brainys.in

Developed a comprehensive examination platform using **Core PHP and MySQL**. Features include real-time result generation, secure session management for students, and a robust administrative dashboard for paper creation and performance analytics.

• **MyWebLink — Single Page Online Profile Creator**

myweblink.in

Built a dynamic SaaS platform for instant digital portfolio generation. Implemented a custom **PHP-based template engine** and integrated **Razorpay** for subscription-based premium features. Currently serving **50+ active users**.

• **OpenPHP — Lightweight PHP Framework**

Developed a custom, modular PHP framework from scratch to standardize MVC patterns and automate routing, reducing backend project setup time by **30%**.

• **NeuroSpeak — AI Interview Simulator**

Implemented a complex backend system using PHP and AI inference engines to simulate technical interviews, providing automated feedback and scoring for over **100+ sessions**.

Education

B.Tech — Computer Science Engineering

ITM GIDA Gorakhpur

2022 – Present

Achievements

- **Runner-up — Smart India Hackathon (National Level)**
- **NCC B Certificate Holder**
