Summary

Python Developer with strong experience in backend engineering, REST API development, automation scripts, data handling, and scalable system design. Skilled in Django, Flask, FastAPI, PostgreSQL, and cloud deployments. Proven record of improving system performance, building efficient APIs, and delivering production-ready backend solutions.

Education

B.Tech in Computer Science Engineering, ITM GIDA Gorakhpur
Intermediate & High School, Saraswati Shishu Mandir Inter College

Skills

Languages: Python, JavaScript, PHP, C++, C, SQL

Frameworks & Technologies: Django, Flask, FastAPI, REST APIs, MongoDB, MySQL, PostgreSQL

Tools: Git, GitHub, Postman, Docker (basic), Linux, VS Code

Core Competencies: Backend Development, API Design, Automation, Data Processing, System Optimization, Deployment

Experience

Backend Developer Intern, Medical Book

- Developed backend modules using Python and Django for doctor-patient record management.
- Built optimized APIs and automated workflows, reducing manual operations by 35%.
- Improved database queries and application performance, cutting response time by 30%.

Python Developer, My Branding Hub

- Built automation scripts to streamline client operations and reduce repetitive work.
- Developed backend functionality for client websites using Python and RESTful APIs.
- Contributed to deployment and maintenance of multiple web platforms.

Projects

- **NeuroSpeak – AI Interview Analyzer:** Python-based AI backend analyzing speech, tone, and text; processed 1K+ user interactions using FastAPI.
- **Medical Book System:** Developed Django modules for patient-doctor management, authentication, and data validation.
- **IoT Parking Management System:** Built Python API backend for real-time occupancy detection using sensor data.
- **CampusHub:** Created backend services for file storage, forums, and submissions using Django REST Framework.
- **The Shades Store – MERN + Python Services:** Added Python microservices for analytics and inventory automation.
- **openPHP & phpCommerce (Earlier Work):** Legacy PHP frameworks showing transition to Python backend development.

Achievements

- NCC 'B' Certificate Holder.
- Smart India Hackathon Finalist (Top 1% National Level).
- Completed multiple backend development internships with consistent on-time delivery.
